DETAILED ACTION

1. Claims 42-45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 21, 2004.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 26-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Welch (U.S. Patent No. 3,613,720).

The statement of intended use carries no patentable weight.

Welch discloses a valve sealing assembly comprising a metallic seat body 10 with a first metallic seating surface (outer periphery with tab 40), a second metallic seating surface 20, a clapper 32, a sealing member 42 with first and second polymeric sealing surfaces that corresponding to the first and second metallic seating surfaces, the first and second polymeric sealing surfaces defining first and second axes respectively, the second polymeric sealing surface cincturing the first polymeric sealing surface, and the first and second metallic seating surfaces disposed on a common plane (see figures 1 and 3).

Allowable Subject Matter

4. Claims 32-34 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a valve sealing assembly: Duggan, and Page et al.
